

NORMAL PROCEDURES

Motor Starting Checklist

- Ensure motor/propeller area is clear of swimmers
- Turn battery switch on
- Trim motor down
- ***If beached, only lower motor enough to get propeller submerged***
- Verify safety lanyard in proper position
- Verify throttle is in neutral
- Turn key until motor runs

Underway Checklist

- Verify bow (front) gate is closed
- Ensure all passengers are seated
- Ensure all lines are onboard and secured
- ***Operate in shallow water with motor tilted up***
- When water depth is unknown proceed slowly and with caution

Docking Checklist

- Place fenders on dock side of boat
- ***Approach beach slowly***
- Utilize minimum throttle (forward idle works well)
- When close to parking position, prepare to utilize reverse to slow and stop
- Tie front and rear cleats to dock

Beaching Checklist

- Have all passengers mid-ship
- Trim motor up so that propeller is just submerged
- ***Approach beach slowly***
